## voestalpine's Strategy for the CO<sub>2</sub>-reduced steel production in Austria

*Tuesday, 20 May 2025 11:15 (30 minutes)*

voestalpine as the quality steel producer in Europe has developed a stepwise transition to a CO<sub>2</sub>-reduced steel production. Already now voestalpine is able to produce steel with lower CO<sub>2</sub> emissions. In 2027 two EAF's will start operation. With it's stepwise transition and hybrid-steel production, voestalpine will keep the quality on the same level as now.
