

Conference on Abrasion Wear Resistant Cast Iron And Forged Steel For Rolling and Pulverizing Mills – ABRASION 2024

Sunday 08 September 2024 - Tuesday 10 September 2024

Wyndham Grand Salzburg Conference Center

Scientific Programme

Fundamental research and application on metallurgy, solidification and solid state transformations including heat treatment behaviour

Physical and thermo-mechanical properties

Mechanical properties including abrasive wear resistance

Deterioration of rolls and its countermeasure

Recent situation on applications for rolls of steel rolling and mineral pulverizing mills
