

## **Sustainable tool steel production - global challenges and solutions**

*Monday, 24 March 2025 11:15 (30 minutes)*

The challenges facing the steel industry — energy-intensive processes, availability of CO<sub>2</sub>-neutral energy and raw materials and complex supply chains — cannot be solved without sustainable and innovative solutions.

Depending on the region, there are different opportunities and risks for a tool steel producer to achieve decarbonization targets, among other things.

### **Speaker Country**

Austria

### **Are you interested in publishing the paper in a Steel Research International special issue?**

**Primary author:** Mr EBNER, Michael (voestalpine BÖHLER Edelstahl GmbH & Co KG, Head of Environment and Investments & Developments)

**Presenter:** Mr EBNER, Michael (voestalpine BÖHLER Edelstahl GmbH & Co KG, Head of Environment and Investments & Developments)

**Session Classification:** Plenary Session

**Track Classification:** Production: Reducing of the CO<sub>2</sub> footprint
